HAMPTON'S VEGETABLE TINCTURE. WE GIVE YOU PACTS! We Appeal to your own Cit :ens!

THOUSANDS SPEAK ITS PRAISE! This article, which has made so many wonderful cures wherever tried, was discovered by Dr. JESSE HAMPTON, now in fine health, in the 79th year of his age. He was born in Virginia in the year 1775, and emigrated to Kentucky, then a wilderness, with his father in 1779. In early manhood he was so reduced by disease as to be almost wrecked in constitution. He spent much of his living for medical advice and attention; and grew nothing better, but worse. Finding no relief from his physician, he resolved to try the restorative powers of the roots, barks, leaves, plants, &c., of the forest. He then dwelt in the midst of the Red Men of the Western Wilds. Having heard much of their skill in the use of the vegetable remedies of the forest, and krowing their mode of medicinal practice must be one of practical experience, and not of theoretical specula-tion, he made himself acquainted with their remedies, and also with the practical medicinal knowledge the early settlers of Kentucky had obtained from the "medi ine men" of the Indians. He care fally studied the nature of the medicines used by them, combined them according to the light he re ceived, used them as he had been taught, and had the cheering satisfaction of finding disease driven from his emaciated body, and vigorous health given in its stead. His case was of no ordinary kind, but astonishing to his friends and neighbors. The fame of it spread; the people far and near sent to the Doctor for his successful and wonderful combination of Indian Remedies, which was freely given to them, until the cases became so numerous, and the demand so great, that the Doctor wrs advised by his friends and induced through justice to himself, to put up his Vegetable Tincture in bottles, and charge price for it, which was treely given-finding its way into the first and most intelligent families, and astonishing all by its wonderful cures, commanding certificates and testimony in its favor from the lead-

The above (says the Scientific American) we select from exchanges, and we would caution persons on reliance in either of them as a perfect remedy for the bite of a rabid dog. When a person is bitten by an animal in such a state, a physician should be called at once, but if this cannot be done, then either of the above plans, but especially the latter, should be pursued, for both certainly have merits. Washing such a bite quickly with clean water, and then applying a leaf of tobacco, we have also been informed, may be relied on as a remedy.

How much better and happier would men be raising their over, he descended the well-known cliffs own food, than lying, scrambling and fighting to get some petty office. The farmer's tenure is not limited by that of ken from the clouds by which she had an Administration, and he is not reduced to dishonorable shifts to life when his party are turned out of power. Our American farmers can be the most independent class in the country. It is much more difficult for those who live in the city to maintain a thorough independence; and what is a man if he be a slave in thought or action? The highest enjoyment in life is the consciousness of being a freeman, not in name merely, but in reality. It sweetens toil and makes life a pleasure instead of a drudgery. When men yield their freedom they cease to live as men ought to live.
